

Roof Program Update

Jeff Steuben

CRRC Executive Director

Low Slope and Steep Slope Definitions

- November 4, 2021 - Definitions of Low Slope and Steep Slope were revised to align with industry standards, and codes & programs
 - **Low-Sloped Roof** - A roof surface with a slope ratio of *less than 2:12*
 - **Steep-Sloped Roof** - A roof surface with a slope ratio *greater than or equal to 2:12*

Other Program Changes

- Updated Roofing Product Definitions
 - “Field-Applied Coating” → “Liquid-Applied Roof Coating”
 - “Fluid-Applied Roof Membrane” → “Liquid-Applied Roof Covering”
- Specified *Approach I* using equations 1 & 3 in ASTM E1980 for calculating SRI
