ENERGY STAR®
PROGRAM UPDATE

Jeff Steuben
CRRC Executive Director

Annual General Membership Meeting
Las Vegas, NV
June 12, 2019
BACKGROUND

• June 5, 2018 - EPA proposed sunsetting ENERGY STAR For Roof Products Program
• July 10, 2018 - CRRC submitted public comment in support of ENERGY STAR Program
• May 28, 2019 - EPA officially announced sunsetting of program
• EPA memo available online [here](#)
EPA TIMELINE

March 28, 2019
• EPA no longer approving Partnership Agreements

June 1, 2021
• No new product certifications

June 1, 2022
• Partners cease use of ENERGY STAR mark from marketing materials and website
EPA will publicly post a list of products which had ENERGY STAR Certifications as of June 1, 2022

If you want to be on this list, maintain your certifications through June 1, 2022
You must pay Renewals fees through 2022 to get on EPA’s final list of products.

You may choose to withdraw your certification at any time.

* Pro-rated Renewals (50%)
You can’t get ENERGY STAR Certifications anymore
Because ENERGY STAR is going away, the CRRC is too.
The loss of ES-CRRC revenue will have a significant impact on CRRC’s finances.
In 2018, income from ENERGY STAR certifications represented 6.6% of CRRC’s total annual revenue.

This included:
- New certifications
- ES-CRRC Renewals
- Verification Testing fees (from 2017 program)
Percent of total revenue from ENERGY STAR certifications has been decreasing the past few years

Decreasing ES-CRRC revenue already built into CRRC budget planning
• Strategic planning will consider CRRC’s long term revenue projections

• CRRC working with EPA to:
  – Communicate sunset to Partners
  – Update programs that require or reference ENERGY STAR certified roof products
  – Support EPA’s heat island education
